### FLATWORK FORMS

**10 GAUGE STEEL** 

Heavy-duty design assures rugged performance and long life.

**4'' WIDE BASE** Provides added support, strength and stability.

#### **BOX-TYPE STAKE POCKETS**

Maximum support provided by pockets that attach to both the base and the face and extend to the base/face corner.

**FULL-HEIGHT END CONNECTION** Provides full-depth alignment and a sturdy, reinforced joint.

#### SPECIAL PUNCHING SLIDING END CONNECTION

Hole punching can be specified in the face, base or top tread.

Sliding end connections permit forms to be stripped over dowel bars.

# 

Metaforms

#### **12 GAUGE STEEL**

Streamlined design permits easy handling and efficient transport.

#### **2" WIDE BASE**

Permits minimum clearance pours and allows forms to be reversed (no top or bottom).

#### V-TYPE STAKE POCKETS

Single pockets and double pockets (on forms 9" and above) securely lock form to either 3/4" or 7/8" diameter stakes.

#### **BULLNOSE END CONNECTIONS**

Provides self-aligning, tight joint.

Metaforms

#### **12 GAUGE STEEL**

Streamlined design provides a convenient method of forming all types of curved and radius work and permits easy handling and efficient transport.

End connections that double as a pocket to be used with either 3/4" or 7/8" diameter stakes.
