

METAL FORMS CORPORATION  
SINCE 1909

## **EMPLOYEE PROFILE**

### **JASON JORDAN** **Production**

Jason started with Metal Forms Corporation in 2021. During his job search, he came across a welding position that was available. After researching the position, he found MFC to seem like "a good company with a solid history". So he applied.

Today, Jason is a Welder at MFC. His main focus is to ensure accuracy. When welding, placing parts in correct positioning is vital before the actual weld takes place. Quality Control is at top of mind for Jason.

When asked what he enjoys so far about working at MFC, he stated "the actual work, the atmosphere and the pay".

When Jason is not at work, he enjoys spending most of his time in his garage woodworking.
