

## EMPLOYEE PROFILE

### **RILEY COREY** Engineer Tech

A family-oriented company and a career-focused position are what brought Riley to MFC. Prior to graduating from college, he was looking for a career in the structural engineering and design field—MFC offered exactly that. In addition, working in a weld shop is where he feels most comfortable and able to contribute his skill set as part of the MFC team.

As an Engineering Technician, Riley is responsible for creating drawings, managing orders, and assisting with various engineering needs. When asked what he enjoys most about working at MFC, he states, *"The family-owned business culture. MFC has a close-knit environment, offers new experiences daily, and allows me to see the work come to life."*

On a personal note, Riley is an animal lover who enjoys spoiling his chocolate lab, Clover, and his cat, Rue. Outside of work, he stays active by working out and participating in activities like hockey, snowboarding, scuba diving, and riding both dirt bikes and sport bikes. Any spare time is often spent relaxing on the lake.
